

COVID 19

By Doris, a Day Therapies Patient at Thames Hospice

What is this virus which envelops the world?
Started in China from bad meat we are told.
Governments are trying their hardest to cope,
But Covid continues despite constant hope.

This silent enemy carries on growing,
To make people ill and even some dying.
Schools close down, students study from home,
Office workers to work at home and alone.

Factories, restaurants, theatres and more,
Are closed to the public can't enter the door.

What is to happen if this carries on?
Our economy suffers as it mustn't prolong.

Life seems so weird and lonely now,
Because Covid 19 is winning somehow.
But we must keep fighting this horrible foe,
For one day a vaccine will make it go.
